Dear Indus Systems Customer:

        We   hope you are as pleased with your Indus GT Disk Drive as we
were to   manufacture it for you. This letter   has been written to
demonstrate   several features of the GT Estate Wordprocessor: Right
Margin Justification, Automatic Paragraph   Indenting,   Inserting
Blank Lines, and
                        Centering Lines

In addition to these standard printer   functions,   the GT Estate
Wordprocessor can take advantage of other capabilities   of your
Epson MX-8Ø or compatible printer, such as underlining.

        **It is possible to convey importance or noticibility to text
without underlining merely by turning on emphasized or double-strike
type fonts.**

                        Sections of condensed print can lend variety, emphasis
or merely place more
                        words per page   for your longer documents.   With today's
 postage rates and
                        duplicating costs this printing efficiency is becoming more popu
lar.

        You   will   have   to   manually
compensate   with   margin   settings
for   the number of characters   that
can fit on one line   when   you   are
in   condensed   or   expanded   print
fonts -- your   wordprocessor   only
knows   how   many   character   spaces
you have allowed per line, not   how
wide   the   characters or your paper
are!

        After a short period of learning the appropriate control codes
for   the functions   you   want   your   printer   to perform and getting
accustomed to its command sequences and syntax, you will find the GT
Estate Wordprocessor to be   a very helpful and flexible tool for
preparing documents. We hope this sample text has proven useful to
you.   Please feel free to contact us with any suggestions you may
have for improving our products or documentation.

Very truly yours,

Indus Systems
